

**Kawasaki**

'82~'85 Model

**MODEL  
RECOGNITION  
MANUAL**

# Foreword

This Model Recognition Manual has been issued in order to provide the dealers with enough information to distinguish one model from another when a motorcycle is brought to the dealer for troubleshooting or repair. All motorcycles exported from 1982 to 1985 and those produced at Lincoln Factory in U.S.A. are listed in order of nominal engine displacement. Under each engine size, further classification is by model and year. Also this manual covers the three and four wheelers and watercrafts (Jet Ski). Charts in the rear of the manual give production years and export area information.

Along with a photograph of each model, the following pertinent information is supplied:

1. Photographs

Since the photographs show the standard exported motorcycles, there may be minor difference in appearance between the picture and the actual motorcycle. For example, the motorcycle exported to some countries may have a different handlebar or fender, or may have no turn signal lights, reflectors or seat band.

2. Model Year

The model year next the model name shows the approximate year of production.

3. Engine Type

The engine type is given for the first year of the model, and apply to all the other years unless changes are noted:

4. Color

Color is one of the most effective means of recognizing the model. Colors of the fuel tank and front fender are given for this identification. When ordering the painted parts, be sure to include the color code from the Parts Catalogue.

5. Engine and Frame Numbers

Engine and Frame Numbers with the prefix will give you positive identification. The “ ~ ” mark following an engine/frame number indicates that the number shown is the first number used for that model and year (Ex: AR050AE000001 ~). The blank in the frame number shows the digit that changes from one machine to another (Ex: JKAKXXA1□DA000001).

6. Part Numbers of the Parts Catalogue, Owner's Manual, and Service Manual (Shop Manual)

These part numbers are given so that the correct Parts Catalogue or Manual will be used when servicing the motorcycle or ordering the parts.

7. Remarks

This gives you the features of the model, relationship to other models, or differences in appearance from other similar models.

8. Major Changes

Major changes from the previous year's model are given here for comparison.

This manual covers from the 1982 to 1985 models. Refer to the following Model Recognition Manuals for older models.

Model Recognition Manual (P/No. 99930-1001-02) for 1963 ~ 1978 models

Model Recognition Manual (P/No. 99930-1002-01) for 1979 ~ 1981 models
